

S.P SACHINTHA NIMESH

SOFTWARE ENGINEERING INTERN

Email : sachinthanimesh370@gmail.com
Phone No : +94 776530084
GitHub : [SachinthaNimesh370](https://github.com/SachinthaNimesh370)
LinkedIn : [Sachintha Nimesh](https://www.linkedin.com/in/Sachintha Nimesh)

PROFILE

Third-year Computer Engineering undergraduate with a strong foundation in full-stack development and DevOps. Experienced in building scalable applications using **Spring Boot, React, React Native, and MySQL**, with additional skills in **Docker, CI/CD pipelines, and AWS**. Passionate about solving real-world problems through software and eager to contribute to impactful projects as a software engineering intern.

EDUCATIONAL QUALIFICATIONS

Bachelor of Science in Computer Engineering
University of Jaffna, Sri Lanka

2022 to Present

TECHNICAL SKILLS

- **Languages** : Java, JavaScript , TypeScript,
- **Frameworks & Libraries** : Spring Boot, ReactJs, React Native , NestJs
- **Databases** : MySQL, MongoDB
- **Cloud Services** : AWS
- **DevOps & CI/CD Tools** : Docker, Jenkins, GitHub Actions, CI/CD Pipelines
- **Other Tools** : Git, Postman
- **Soft Skills** : Team Collaboration, Problem Solving, Agile Development

INDIVIDUAL PROJECTS

01 Hostel Management System

2025

A full-stack web application designed to manage university hostel operations, including room allocation, user role management, and room occupancy monitoring.

- **React Web Application:** [code](#)
Developed a responsive interface for admins, wardens, security, and students, featuring room allocation, role-based access, occupancy monitoring, and notification tracking.
- **Spring Boot Backend:** [code](#)
Implemented backend services for user roles, room allocation logic, occupancy status, and real-time notifications.
- **NestJS Backend:** [code](#)
Integrated Meta WhatsApp Business API and GPT-4.0 mini, enabling students to submit complaints via WhatsApp and receive context-aware, AI-generated responses through automated complaint processing.

Technologies: Spring Boot, ReactJs, NestJs, MySQL, Docker, JPA, ModelMapper, Lombok, Axios, Mui, Postman, JWT, Meta WhatsApp Business API, OpenAI GPT-4.0 mini

02 Student Attendance System (GPS-Based)

2024

A full-stack system designed to automate and secure student attendance tracking through real-time GPS data validation.

- **React Native Mobile Application:** [code](#)
Built for Android, allowing students to mark attendance via GPS with real-time location validation and a seamless user experience.
- **React Web Application:** [code](#)
Lecturer dashboard for student monitoring, attendance record viewing, and manual overrides, using responsive MUI components.
- **Spring Boot Backend:** [code](#)
Managed authentication, attendance logic, GPS data validation, and RESTful API communication between frontends and the database.

Technologies: Spring Boot, React, React Native, MySQL, JPA, ModelMapper, Swagger, Lombok, Postman

03 OpenAI API Integration ChatBot App

2025 – [code](#)

A mobile application developed using React Native with the Expo framework, enabling users to authenticate their OpenAI API keys and interact with the OpenAI chatbot. The app provides a seamless user experience by validating API keys, handling real-time interactions with the OpenAI API, and offering a responsive, user-friendly interface across various devices.

Technologies: React Native (Expo), OpenAI API, JavaScript

04 PeatFeast Mobile App

2025 – [code](#)

PeatFeast is a mobile app for managing remote food and water deliveries. Users can schedule supplies, track delivery progress in real-time, and receive updates. The app ensures seamless data syncing and user authentication via Firebase.

Technologies: React Native (Expo), Firebase

VOLUNTEERING

IEEE Member

2023 - Present

Actively participated in IESL-organized projects like techno exhibition, applying engineering knowledge to solve real-world problems while developing leadership abilities.
